### **World-class Dating Comes to Utah**

SALT LAKE CITY, UT—UtahSpeedDating™ is pleased to announce the introduction of its new line of dating services poised to revolutionize the dating experience of Utah singles. Already the leader among speeddating providers in Utah, this announcement adds very substantial additions to UtahSpeedDating's already impressive dating service lineup.

“We are not satisfied by simply being the best speeddating service out there. We are committed to providing Utah singles with the very best opportunity and support to develop new relationships easily, comfortably and successfully” said Merrill Chandler, lead facilitator for UtahSpeedDating™. “Look at it this way...when you deliver 40 times the dating opportunities at one-third the price of our nearest competitor, there's a lot of places you can go that the others can't.”

It is easy to see why someone who dates with UtahSpeedDating™ has every opportunity to meet someone special—the list of services offered in one of UtahSpeedDating's memberships is impressive: personalized matchmaking services, dating workshops, private coaching (delivered by credentialed counselors and professional date coaching staff), online profile reviews, dating-style evaluations and a radical approach to speeddating.

“Speeddating is a relatively new phenomenon in the dating world, but we're just not willing to follow the norm of what is already out there,” acknowledged Chandler. “Speeddating is an amazing idea whose time has come but in order to transcend the status quo, we have added a powerful and compelling twist: event themes and facilitated introductions.”

And he's not kidding. A quick review of their revolving event calendar shows themes ranging from “south of the border” fiestas to romantic Parisian rendezvous and Caribbean escapes. “Each of our events has a fun and inviting theme that will allow our members to attend multiple events (even in the same week) and not have the same experience twice. We notice that it adds extra fun and color to these evenings. Additionally, our professional event facilitators create an atmosphere of excitement, comfort and ease,” agreed Chandler.

UtahSpeedDating™ is the only locally owned and operated speeddating organization. It is also the only dating service in the nation that includes unlimited access to most every dating approach rolled into one. The down side? Those hours spent staring at a computer screen in the middle of the night looking for someone to date, just became obsolete. The upside? You won't miss them.
